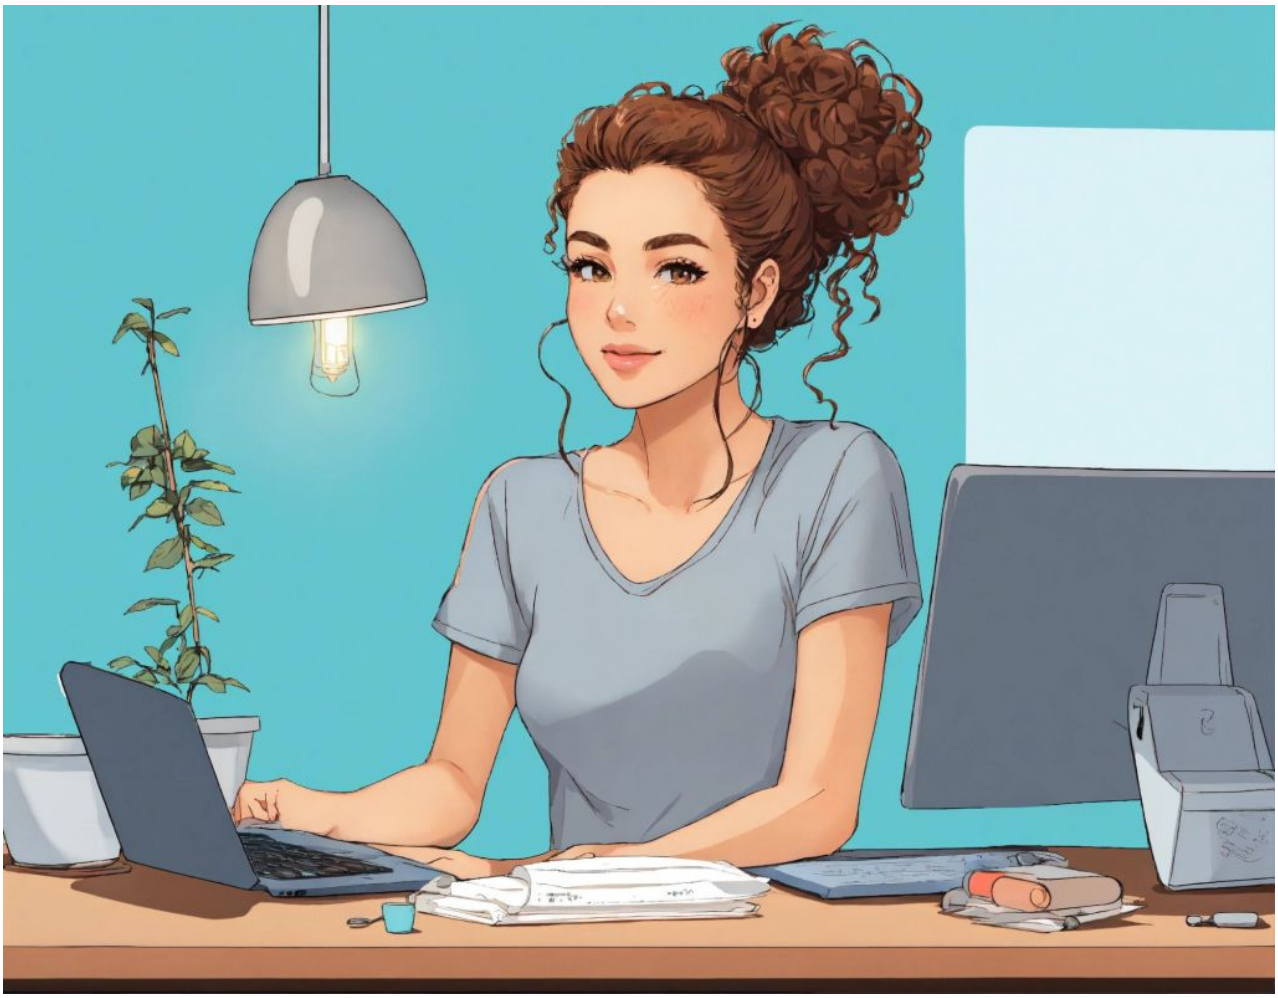
From Profit to Passion: The Evolution of My Blogging Journey

In 2019, I embarked on a blogging journey primarily for financial gain, exploring various platforms without much understanding. Starting with WordPress and later shifting to Google Blogger, I erroneously believed WordPress plugins were exclusive to premium users. After nearly two years of futile attempts to monetize my blogs, frustration set in. It was then that I had a revelation – a shift from profit-oriented content to a personal blog, sharing my life experiences and memories, often hidden from those around me. Even close friends questioned my meticulous documentation, asking about the purpose of safeguarding memories in a diary. I, too, pondered on the utility. Reflecting on my extensive collection of childhood writings, I realized their lack of inspiration and potential to bore. This prompted a shift in focus; my new blog, “THE LIFE OF MINE,” is not about offering inspiration but aims to unveil the genuine struggles of a disabled girl, a narrative often concealed from the world.

Creative Sparks: The Genesis of My Innovative Ideas

The book titled “The Torn Veil” served as a profound inspiration for me. This narrative revolves around a disabled girl’s miraculous journey of learning to walk through divine intervention. I harbored a longstanding desire to craft a similar story in book form. However, upon reflection, I opted for blogging as a means to lay bare most aspects of my life while preserving a certain level of privacy. Although I chose to conceal minor details deemed unnecessary, my aim was authenticity in conveying the essence of my experiences. When others inquired about sharing my blog, I refrained, envisioning a posthumous recognition by people in my orbit who would come to understand different facets of my life. Beyond chronicling my disability, I utilize this platform to emphasize that love transcends all boundaries. While I can’t quantify the impact of “The Torn Veil” on readers worldwide, I, personally, experienced transformation and inspiration. My aspiration is modest – if just one person among billions resonates with my perspective, my blog has fulfilled its purpose.

Embracing Creativity: Defying Perceptions on Time and Value in Blogging



I consider myself a dedicated blogger, often emphasizing that if an activity doesn't generate income, it's perceived as a waste of time. Engaging in crafts, art, and blogging occupies my time, yet my parents and others struggle to comprehend its value due to its limited financial returns. While I acknowledge the potential for earnings, I am reluctant to commodify my creativity regularly. Despite the prevailing opinion that I may be wasting time at home, my blog, often deemed futile by some, is my source of life, fostering creativity and facilitating the acquisition of new skills. Proudly, I declare myself a blogger, chronicling my entire life in written form.

Streamlining Creativity: My Blogging Journey and Tools of Choice

As mentioned earlier, my blogging journey began on various platforms, with diverse websites. However, in the recent two years, I've transformed my diary entries into a cohesive blog. Initially, I utilized Butler English for my writing, and for images, Pinterest was my go-to until copyright issues arose. Quilbot aided in rephrasing and grammar checks, but image searches led me to YouTube for free alternatives. Despite struggles, I eventually found an AI-generated image platform like lexica. Crafting content involved multiple websites for paraphrasing, headings, keywords, and more. Enter ChatGPT, a game-changer for content creation with its one-click capabilities for paraphrasing, meta headings, subheadings, keywords, tags, and categories. Utilizing the free version is ample for my needs. WordPress, with its robust tools even for free users, became my chosen platform. Canva, a creative powerhouse, stands out for design needs. Despite my

initial search for various tools, Canva's all-encompassing features in one app proved unbeatable. Exploring new Canva tools for blog creativity brings immense joy. With a platform, templates, and images in place, my focus now is to continue writing and sharing my blogs…💛

"I don't squander moments; I forge a history that resonates, capable of sparking transformative change in at least one soul during this lifetime."
